

Thomas and Linda

Dear Birth Parents,

Hello. Our names are Thomas and Linda. Words cannot begin to express how thankful we are for you! Being parents blessed with one biological child, we can really appreciate the unconditional love you obviously have for your child. If given the honor, we will surround your child with unconditional love for the rest of their lives.

Our son Nicholas is very well rounded and healthy. He is quite compassionate and nurturing to others. He is a good student and involved in many activities such as Boy Scouting, sports and volunteering. He has many friends. Nicholas often expresses the desire to care for a sibling .He says he would love to teach him/her and would love to be a big brother by helping them grow.

We have always wanted to make our family complete by having another child. After a very serious car accident, Linda was no longer able to have another child. But, we never gave up hope! We both come from large families and know having a sibling is a precious gift. We feel that an adopted child is a true gift from God equally as much as a biological child.

We are married 15 years but started out first as best friends. We consider ourselves soul mates and very blessed to have each other. We have always been a close couple with an open relationship. We often speak about how unique and strong the bonds of love we have for one another are. We also believe that children learn what they live. We would love to share our love with another child and teach them about how wonderful life and love are.

We have a strong family with our Catholic faith being a major component. We go to church together, we eat meals together and we celebrate together. We are very close with our family. Our family consists of grandparents, aunts, uncles, nieces, nephews and cousins who live close by and who are extremely supportive.

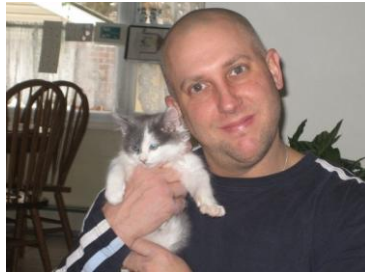

Education is important to us and your child would have a private school education. We are also a family who is active in volunteering both in our church and school community. We find this very fulfilling and feel that it is a great example to teach a child to give back by helping others.

We love to vacation, go for bike rides, play sports, go to the theatre, go to museums and play board games.

We live in a beautiful home with a large backyard, play area, swing set and patio. We have a finished playroom filled with toys and your child would have their own bedroom. Our home is in a pretty neighborhood with parks and shopping centers nearby. We live on a tree lined street with many children of all ages. We are friendly with all of our neighbors.

Quote/Saying: *"To love is to live"*

*"Everything happens for
a reason"*

Having a family is a privilege we take quite seriously. We devote ourselves to being there for our family. Linda works part-time three days a week, only a couple of hours a day and Thomas works full-time. We have both been with our employers for almost twenty years. Both of our schedules are flexible, one of us (if not both) will always be home. Although we have close family members willing to help out, it has always been important to us as parents, to be the primary caregivers.

At this time, we want to say thank you. If you choose us to be the adoptive family to your child, we will always guide and support him/her. Should you choose to receive letters or photos, we would be honored to share them with you. We will provide them with all the tools they need to have a happy, healthy and fulfilled life. Please know that your child will always know how much they are loved. They will be told of the love you have for them and of the great sacrifice you made for them. God bless you.

Sincerely, Linda and Thomas
